**TECHNICAL DATA SHEET – Leather Care Div.**

**FABRIC RUST REMOVER**

**DESCRIPTION**

**Fabric Rust Remover** is a specific water-based cleaner for cleaning rust stains from fabric. The product is easy to apply and does not leave residues.

**HOW TO USE**

**Pre-Test:** Dampen a white cloth with water only. Rub the fabric lightly to see if colour is transferred to the cloth. If colour is removed just with water, it is certain that any product will remove colour, so in this case do not use the cleaner. If there is no colour loss with water, repeat the test with **Fabric Rust Remover**, being sure that you are satisfied with the results.

**Directions:** Apply **Fabric Rust Remover** directly onto the rust stain and leave to act for a few minutes. Blot the area with a dry white cloth in order to absorb the rust molecules. Repeat the operation until the stain has completely disappeared.

PHYSICAL CONSTANTS	Standard Value	Test Method
Appearance	Yellowish liquid	MDA 008
pH ( 1:10 )	2.5 ± 1	MDA 004
Density (g/cm <sup>3</sup> )	1.03 ± 0.05	MDA 018

**STORAGE**

Non-dangerous product. Store between +5/40°C

**Rev.**

07.2013

**MINIMUM SHELF-LIFE – HANDLING INSTRUCTIONS**

The product is guaranteed for its physical and quality characteristics 24 months from the date of production. It has to be kept in its original packaging, well sealed and stored following the conditions in our technical data.

This document is exclusively reserved for professional users.

All information regarding correct use and any hazardous content are available in the safety data sheets.

All our information and suggestions are supplied on the basis of our present knowledge, and are subject to careful tests. However, we cannot accept responsibility for the use of the product, which must be verified and evaluated for its suitability or otherwise by the customer. Declared physical constants are monitored in production and guaranteed by FENICE S.p.A.
