## TECHNICAL DATA SHEET – Leather Care Div.

# FAST LEATHER GLUE

### DESCRIPTION

**Fast Leather Glue** è is a flexible resistant adhesive formulated for repairing slits or cuts.

Solvent based, flexible, resistant adhesive created for repairing slits or cuts on leather and vinyl. It dries quickly. Its flexible nature enables it to be used on leather without modifying any of its characteristics.

It is a viable alternative to **Leather Glue WB** particularly where there are slits &/or cuts on leather and vinyl that have become dried out, stiff or squeaky over time.

### HOW TO USE

Clean the area to be treated with **Ultra Rapid Leather Cleaner**.

Leave to dry. Use a spatula or a knife to apply **Fast Leather Glue** directly to the edges of the damaged leather.

Join the 2 parts and hold them firmly together. Remove any excess product immediately.

Heat with a professional dryer for a few seconds or allow to dry naturally for a few minutes.

When repairing an open cut a backing material will be needed to hold the **Supportive Mesh** and keep the cut from future separation.

**Touch Up Pigment** might be needed to complete the repair. Use **Leather Protector** to give the needed protection against soiling.

PHYSICAL CONSTANTS	Standard Value	Test Method
Appearance	Yellowish liquid	MDA 008
Flashpoint (°C)	-19 ± 1	MDA 003

STORAGE	Rev.
Flammable product. <b>Store at +15/25°C.</b>	04.2014

### MINIMUM SHELF-LIFE

The product is guaranteed for its physical and quality characteristics 12 months from the date of production. It has to be kept in its original packaging, well sealed and stored following the conditions in our technical data.

This document is exclusively reserved for professional users.

All information regarding correct use and any hazardous content are available in the safety data sheets.
