VISIT WWW.FLEXIPADS.COM

Dual Action

We stock one of the most comprehensive range of professional DA pads. Regular product development insures we cover the latest most demanding tools.

The Original

Thick and durable pads, an essential item for many customers.

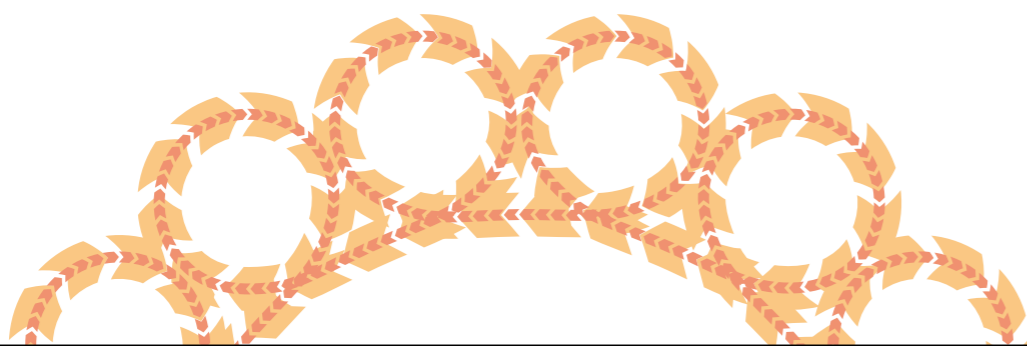

Hard Sanding

Thinner firmer pads recommended for use with coarse abrasives. Suitable for Dynabrade Machines.

Light Sanding

Ultra tough fibre glass back plate with side dust extraction vents.

Orbital Backers

Medium and soft density orbital backers with a GRIP surface for use with any hook and loop consumable.

X-SLIM™

Extra slim 18mm high foams ideal for orbital sanders.

With angled sides and rounded edges to give a phenomenal finish with no marks or swirls.

How to Use

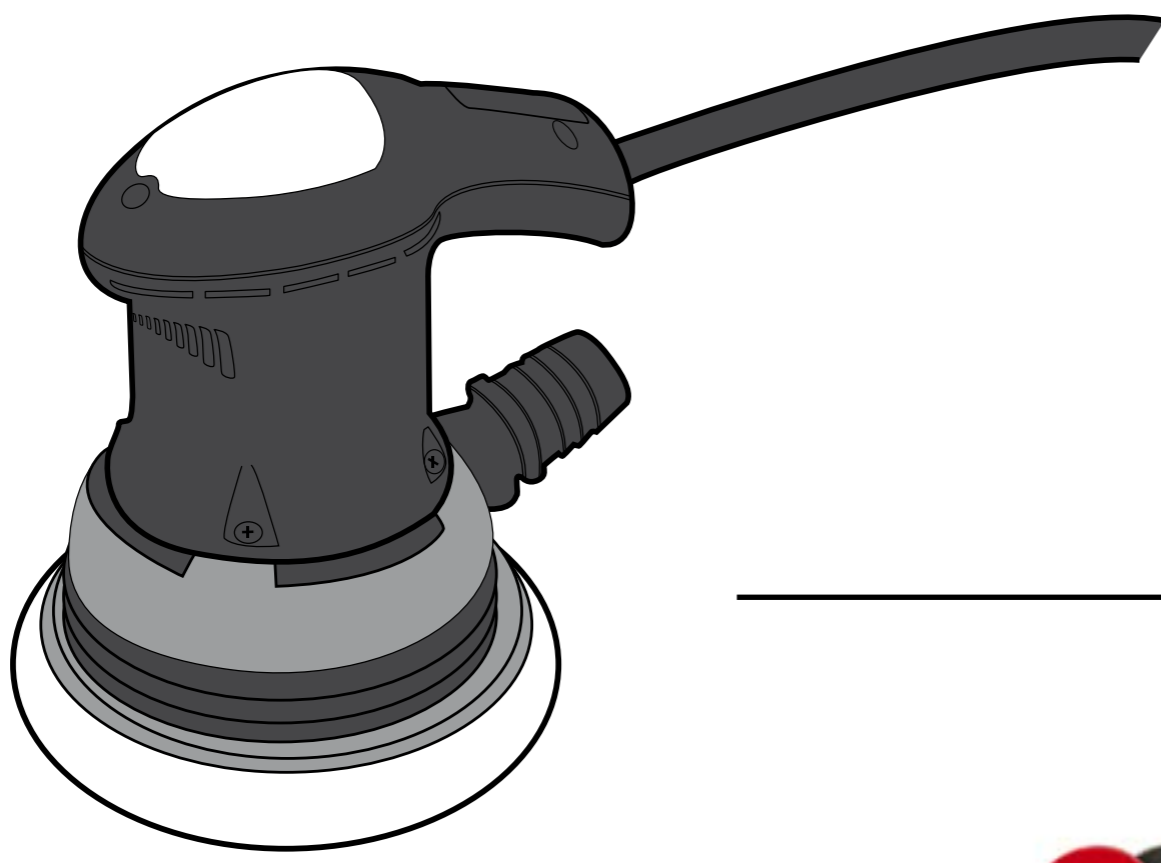

Always use the pad flat on the work surface.

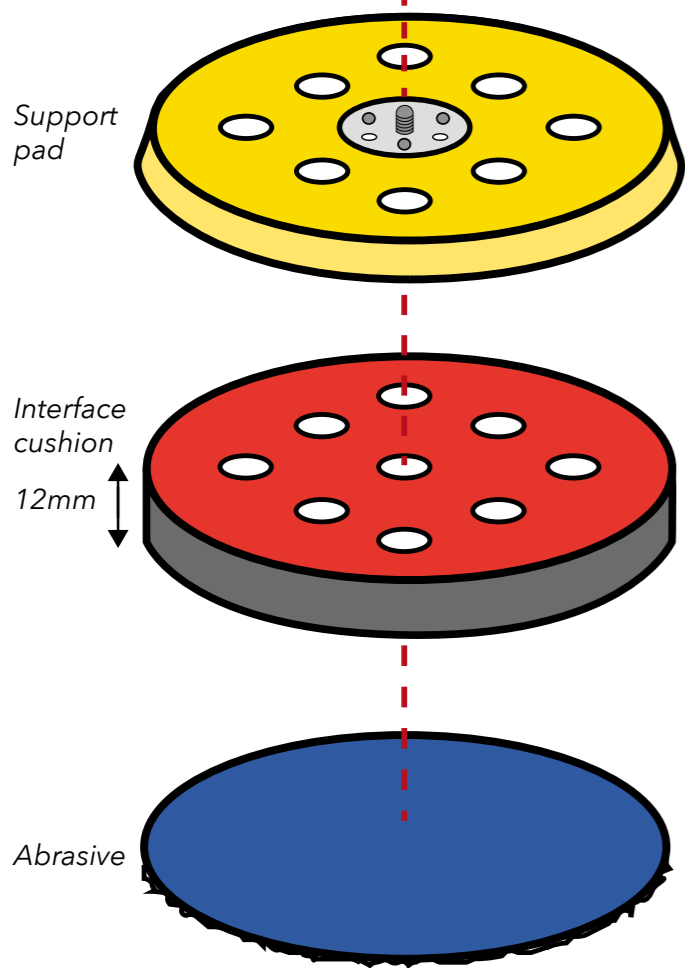

Never use at an angle as this can damage
the work area and the backing pad.

Interface Cushions

12mm soft foam cushion placed between pad and abrasive disc to create a very soft sanding surface.

1-Step

Cutting

Finishing

Black microfibre uses a shorter pile for a faster cutting action. Perfectly bonded to our firm backing foam.

White microfibre cutting disc backed with a firm cutting foam. Works wonders with slightly oilier compounds.

The best around to remove swirls and holograms! Works quickly to give you unparalleled gloss!

To keep the microfibre surface working at its peak, rinse pads in warm water and air dry.
