

TOTAL Paint Solutions Since 1979

Price List April 2022 (Revised)

LEATHER CLEANER

Leather Cleaner is a balanced, pH-neutral, water-based product that gently cleanses, while thoroughly enhancing the natural beauty and feel of your leather. It is most effective for cleaning general soiling and protein or water-based stains. Leather Cleaner is formulated for use on all grained, top-coated and aniline leather.

Pre-Test: Apply the product to a hidden area and only proceed if you're satisfied with the result.

Directions: Always test colour fastness prior to treatment. Vacuum clean the leather with a soft-tipped brush. Shake the bottle well. Use gloves. Wet a sponge with Leather Cleaner, squeeze out the excess, and dab until the soil is dissolved. Do not rub! Wipe away all residue with a clean, non-abrasive cloth. Clean leather with a wet sponge dampened in water. Allow to dry, then treat with Leather Protector.

Part No.	Description	Size	€
63612	LEATHER CLEANER	250ML	9.78
63581	LEATHER CLEANER	1LT	31.73
63582	LEATHER CLEANER	5LT	131.51

ULTRA RAPID LEATHER CLEANER

Ultra Rapid Leather Cleaner is a strong cleanser for pigmented leather, designed to remove difficult stains or ingrained dirt in pigmented leather that have built up over time.

Pre-test: Before using, test the colour fastness of the leather. Apply Ultra Rapid Leather Cleaner to a white cloth and gently rub the leather on a hidden area. Check that you are satisfied with the result and that there is no colour transfer to the cloth.

Directions: First, try to clean with Leather Cleaner. If the results are unsatisfactory, use Ultra Rapid Leather Cleaner after having carried out the pre-test. Clean the leather with a vacuum cleaner using a soft brush. Shake the bottle well. Use gloves. Dampen a sponge with the product and pad leather until the stain dissolves, constantly checking that there is no color transfer. In the event of colour loss, discontinue use immediately. Do not rub aggressively! Remove any residue of the product by using a clean, lint-free cloth, then cleanse with Leather Cleaner. Leave to dry and then apply Leather Protector.

Part No.	Description	Size	€
63546	ULTRA RAPID LEATHER CLEANER	250ML	9.78
63544	ULTRA RAPID LEATHER CLEANER	1LT	31.73
63556	ULTRA RAPID LEATHER CLEANER	5LT	131.51

POWER CLEANER

Power Cleaner is a highly advanced product designed to remove difficult stains from pigmented leather.

Pre-Test: Due to the variety of leather finishes, we recommend testing on a hidden area to be sure the leather finish is fully compatible with the cleansing process.

Wet the sponge with water. Gently rub a hidden area and check if there is color transfer to the sponge. If not, dilute 1 part Power Cleaner with 5-8 parts water, and wet the sponge with the prepared mix. Repeat the test from before and check that there is no color transfer to the sponge. If you are satisfied with the result, proceed with cleansing.

Directions: Wet the sponge with Power Cleaner already diluted and rub in circular motions. After cleaning, rinse with water and leave to dry at room temperature.

Part No.	Description		Size	€
60667	POWER CLEANER		250ML	11.43
F-60668	POWER CLEANER		1LT	31.73
62628	POWER CLEANER		5LT	135.41

DYE TRANSFER STAIN REMOVER

Dye Transfer Stain Remover is a solvent-based cleanser specifically made to remove dyes transferred from jeans, clothes, pillows, blankets, ink, newspaper, etc. onto finished leather and vinyl.

Pre-test: Apply the product onto a hidden area. If leather darkens after drying or you experience discolouring or are otherwise not satisfied with the result, discontinue use.

Directions: Shake the bottle well. Dampen a soft cloth with Dye Transfer Stain Remover, and gently dab the area to be treated so that the cleaner acts in depth. If necessary, repeat the operation. If the dye is not removed easily, do not rub aggressively. Remove any residue using Leather Cleaner and wipe the leather with a clean non-abrasive cloth dampened with water. Allow to dry, then treat with Leather Protector, which will ease the removal of any future dye transfers. We recommend removing stains promptly because removal becomes increasingly difficult with time. Do not use on suede/nubuck.

Part No.	Description		Size	€
65896	DYE TRANSFER STAIN REMOVER		250ML	30.80

LEATHER & TEXTILE DEGREASER

Leather & Textile Degreaser effectively removes accumulated or saturated oil based stains from leather safely and effectively. It is formulated to penetrate into the leather, absorb the stain, and lift it into an easily manageable powder. For heavily stained areas, an additional application may be needed. If possible, direct application to the backside is most effective at removing heavy stains.

Pre-Test: Apply to a hidden area to see if the leather is colourfast. If the product removes colour from the surface, discontinue use.

Directions: Cover the areas that are not to be treated. Grease expands under the surface, so leave about 50% more of the visible dark area uncovered – you’re only seeing the tip of the iceberg! Shake can thoroughly. Hold the can upright and 15-20 cm (6 to 8 inches) from the spot. Press the valve button fully. Spray heavily enough to saturate the spot. Immediately clean the valve by turning the can upside down and spraying it until only air is coming out. Let Leather & Textile Degreaser dry completely for at least 4 hours (overnight is recommended). Do not use a heat source, or you will inhibit the degreasing action.

Part No.	Description		Size	€
66836	LEATHER & TEXTILE DEGREASER		400ML	52.89

LEATHER RENEW 3IN1

Leather Renew 3-IN-1 is ideal for the care of all leather, such as on sofas, and in car interiors, jackets, shoes, and bags of all colours. 3 treatments in a single product! It’s triple action ensures complete care and keeps your leather constantly hydrated and protected.

CLEANSING: Leather Renew 3-in-1 gently cleanses and perfumes leather.

CONDITIONING: Nourishes leather to ensure all its natural softness is enhanced.

PROTECTION: Creates an invisible barrier to facilitate cleansing and to ensure the original appearance is preserved.

Pre-test: To ensure optimal results, the product should be pre-tested on a hidden area before proceeding with coverage of the whole surface.

Directions: Apply in light, circular motions. Do not rub aggressively. Leave to dry naturally. May be used on any type of leather, except suede or nubuck.

Routine care: Use as required to cleanse, nourish and protect your leather.

Part No.	Description		Size	€
65755	LEATHER RENEW 3-IN-1		250ML	21.96
65756	LEATHER RENEW 3-IN-1		1LT	70.45

MOLD REMOVER

Mold Remover is formulated for the removal of stains caused by growth of mould on leather exposed to high humidity, moisture or dampness. If identified early, Mold Remover eliminates surface stains, inhibits further growth, and restores leather to its original condition. It is a specialised product that readily resolves problems of mould.

Pre-Test: Use protective gloves during application and avoid contact with eyes or skin. Apply to a hidden area. If there is colour change, colour loss, or darkening, do not use.

Directions: Dampen a soft cloth with Mold Remover and gently rub the area to be treated. Repeat this procedure after 24 hours if necessary. If the mould has been present for a long time, it may be necessary to re-colour the leather. Clean with Leather Cleaner to remove any trace of residue left by Mold Remover. Apply Leather Protector with a cloth and wipe gently in circular motions.

Note: Do not use Mold Remover on nubuck leather. For nubuck leather, rub with a dry Reviving Sponge.

Part No.	Description		Size	€
63542	MOLD REMOVER		250ML	37.91

INK REMOVER

Ink Remover cleans recent ballpoint ink or lipstick from top-coated leather, vinyl or vinyl like surfaces. It may sometimes be used for fresh stains on bycast and aniline leather that have had prior treatment with Leather Protector. On some aniline leather, it may cause darkening that could disappear in a couple of days. Test before use.

Pre-test: Apply the product on a hidden area to check the outcome. If leather darkens after drying or you experience discolouring or are otherwise not satisfied with the result, discontinue use. Removal becomes increasingly difficult, or impossible, over time.

Directions: Rub the product directly over the spot a few times, allowing 30 seconds for the ink to dissolve. Once you see the ink start to dissolve, use a soft, lint-free cloth to wipe away both the Ink Remover and the ink mark. For stubborn stains, a second application may be needed. Do not rub! If ink is not removed after two applications, contact us, as a leather expert will need to remove the stain.

Part No.	Description		Size	€
58166	INK REMOVER STICK		20ML	16.15

DEEP CLEANER F

Deep Cleaner F is a solvent cleaner for leather, specific for pigmented leathers. It performs an effective cleaning action, removing all kinds of stains, in particular persistent grease / oil stains or stains due to colour transfer from newspapers or jeans. This product should be used in an area with good ventilation.

Pre-Test: Before use, test the skin colour resistance by soaking a white cloth with the product and lightly rubbing the skin in a hidden area. Make sure that the result obtained is satisfactory and that there are no leaks of colour.

How to use: Initially, try cleaning the leather with Strong Cleaner. If satisfactory results are not obtained, use Solvent Cleaner for Leather after carrying out a preliminary test. Clean the skin with a vacuum cleaner using a soft brush. Shake the bottle well. Use gloves. Moisten a sponge with the product and pat the skin until the stain dissolves, constantly checking that there is no colour transfer. In case of colour transfer, discontinue use immediately. Don't rub! Remove all product residues using a clean non-abrasive cloth and wash with Delicate Cleaner. Allow to dry and treat with Protective Skin.

Part No.	Description		Size	€
63529	DEEP CLEANER F		250ML	19.18
63528	DEEP CLEANER F		1L	48.44

NUBUCK CLEANER

Nubuck Cleaner is a water-based cleaner for an effective, delicate cleansing action on suede or nubuck leather. It works on most common types of stains that accumulate with use. Combined with its cleaning agents are feel modifiers to enhance the touch of this luxurious leather.

Pre-Test: Apply the product onto a hidden area. If leather darkens after drying, or you experience discolouring or are unsatisfied with the result, discontinue use.

Directions: First, try to absorb as much of the stain as possible using an absorbent cloth. Apply the Suede Cleaner to a sponge. Gently rub the sponge on the nubuck / suede leather. Leave to dry naturally or use a hair dryer. When completely dry, brush lightly with the Reviving Sponge to restore softness and colour. After cleaning, renew the protection using the Suede Protector.

Part No.	Description		Size	€
63588	NUBUCK CLEANER		250ML	13.99

LEATHER PROTECTOR

Leather Protector is a water-based protective cream that creates an invisible barrier on leather to prevent everyday dirt from penetrating . Its natural ingredients provide softness and shine to your leather. It is designed for use on all grained, top-coated and aniline leather and it enhances the feel and colour of this sensitive leather, while always adding stain resistance.

Directions: Unless the leather is new, clean with Leather Cleaner. Shake the bottle well. Apply Leather Protector to a cloth and rub in circular motions. Leave to dry naturally. Can be polished with light pressure. Do not rub aggressively! Do not use on suede/nubuck.

Routine Care: Leather Cleaner and Leather Protector should be part of a regular schedule of cleaning and protection of leather furniture. For high-use pieces, such as recliners or other living area furniture, monthly cleaning is recommended. For lesser-used furniture, full cleaning and protection should be done 2-4 times per year.

Part No.	Description		Size	€
63613	LEATHER PROTECTOR		250ML	21.96
63583	LEATHER PROTECTOR		1LT	70.45

HIGH-GLOSS LEATHER PROTECTOR

High-Gloss Protector is a water-based protective and maintaining cream for leather that restores its original glossy appearance.

Pre-Test: Dampen a white cloth with water only. Rub the leather lightly to see if colour is transferred to the cloth. If colour is removed with water alone, it's certain that any product will remove colour. Do not use the protector in such cases, and contact a specialist. If there is no colour loss with water, gently shake the bottle and repeat the test with High-Gloss Leather Protector. Make sure you are satisfied with the result.

Directions: Unless the leather is new, clean with Leather Cleaner. Shake the bottle. Apply to a cloth and rub in circular motions. Leave to dry naturally. Can be further polished with light pressure. Do not rub aggressively! Do not use on suede/nubuck.

Routine Care: Recommended 2-4 times a year.

Part No.	Description		Size	€
66399	HIGH GLOSS LEATHER PROTECTOR		250ML	21.96
61780	HIGH GLOSS LEATHER PROTECTOR		1LT	70.45

INK BLOCKER

Ink Blocker creates an ink and stain-resistant barrier on the surface of leather to keep it clean over time. It prevents pens from writing on leather and any ink stays on top of this barrier, where it can be removed easily.

Pre-test: Before use, we recommend testing the colour fastness of the leather. Test on a hidden area, using a soft, white cloth dampened with water only. Rub the leather gently to see if colour is transferred to the cloth. If the colour does not come off with water, test the Ink Blocker on a hidden area and make sure you are satisfied with the result before proceeding.

Directions: Always clean leather with Leather Cleaner. Wipe with a clean cloth. Shake the bottle well. Apply Ink Blocker using a white, clean cloth, taking care to cover the entire surface of the leather evenly. Leave to dry naturally after application. Do not rub aggressively! Can be used on any leather type, except suede or nubuck.

Routine Care: Recommended 2-4 times a year or as needed.

Part No.	Description		Size	€
74680	INK BLOCKER		250ML	23.96

TEXTILE PROTECTOR

Textile Protector is an efficient water-based protector for most kinds of fabric. A technologically advanced product to protect fabric from oil, alcohol, and protein and water-based stains. The protector forms a breathable, invisible barrier that increases fabric's stain resistance and cleaning ability.

Pre-Test: Dampen a white cloth with water only. Rub the fabric lightly to see if colour is transferred to the cloth. If colour is removed with water alone, it's certain that any product will remove colour, so do not use the protector in such cases. If there is no colour loss with water, gently shake the bottle and repeat the test with Textile Protector.

Directions: Clean the fabric with a vacuum cleaner, then remove any stains with Textile Stain Remover and leave to dry. Shake the bottle vigorously. Replace the cap with the trigger contained in the kit. Apply a light coat of Textile Protector on all the surfaces of the fabric without wetting too much. Protect very well areas that receive the most wear. Leave to dry for 8 hours.

Routine care: Textile Care Kit should be used as part of a regular cleaning and protection program. For heavily used areas, such as in car interiors or on armchairs, we recommend monthly cleaning.

Part No.	Description		Size	€
62284	TEXTILE PROTECTOR		250ML	21.34

PULL-UP REVIVE

Pull-Up Revive renews and restores waxed or oiled leather. It contains the same type of formulation applied by a machine at the tannery. With Pull-Up Revive, this process can now be done by hand to renew pull-up leather outside of the tannery.

Pre-test: Pull-Up Revive is designed for pull-up leather. Ensure your leather has a pull-up effect prior to use. Apply product to a hidden area, heat, and make sure you are satisfied with the result. If not, discontinue use.

Directions: Shake well prior to use for best results. Apply Pull-Up Revive to a lint-free cloth and rub lightly into surface scratches or other areas to be restored. The use of a domestic hairdryer will aid product activation. For deep scratches, it may be necessary to rub the area as you apply heat from the dryer. A second application may be needed for leather with excessive wax or oil loss.

Routine care: Use Pull-Up Revive as needed to keep your pull-up leather looking new.

Part No.	Description		Size	€
63591	PULL-UP LEATHER REVIVE		250ML	21.14

ANTI-SQUEAK

Anti-Squeak is a water-based cream for pigmented and bycast leather. It is an excellent product designed to eliminate the squeaking noise made by leather. Anti-Squeak hydrates and revitalizes leather to restore flexibility and improves the feel of leather that has become dry, stiff or squeaky.

Pre-Test: Apply the product to a hidden area and only proceed once the desired result has been obtained.

Directions: Vacuum the leather with a soft-tipped brush. Clean with Leather Cleaner. Leave to dry. Shake the bottle well. Apply Anti-Squeak with a clean cloth, wiping in gentle, circular motions.

Do not rub aggressively! Leave to dry naturally.

Part No.	Description		Size	€
66917	ANTI-SQUEAK		250ML	13.99

SCRATCH REMOVER

Scratch Remover is a water-based product used on natural leather, such as aniline and pull-up. Do not use on nubuck or suede. It is a simple solution for healing and blending surface scratches and rubs on natural leather. It helps restore the surface colour as well as to blend the damage. Its highly effective on fingernail scratches.

Pre-Test: Apply Scratch Remover by cloth on a discrete area. It's normal for scratch Remover to transfer some colour to the cloth while moving and blending colour over the scratch. However the colour transfer may be too dramatic on very sensitive leather. Therefore, check the tested area for both darkening and lightening of the colour. If you are not satisfied with the result when the product is dry, discontinue use and contact a specialist.

Directions: Apply Scratch Remover on a soft cotton cloth and rub lightly on the damaged area, until the damage has disappeared. Don't rub aggressively! A normal hair dryer will improve the effectiveness of the product. When the repaired area is completely dry, protect it with the Leather Protector.

Part No.	Description		Size	€
54834	SCRATCH REMOVER		20ML	17.01

FABRIC INK & PLUS REMOVER

Fabric Ink & Plus Remover is a water-soluble, solvent-based product suitable for ink, colour, shoe cream, nail varnish and tar stains.

Pre-Test: Dampen a white cloth with water only. Rub the fabric lightly on a hidden spot to see if colour is transferred to the cloth or if there is a colour change in the fabric once dry. If colour is removed with water alone, it's certain that any product will remove colour, so do not use the cleaner in such cases. If there is no colour loss or change with water, do the same test with Fabric Ink & Plus Remover and ensure that you are satisfied with the results.

Directions: Dilute one part Fabric Ink & Plus Remover in 5 parts water and dampen a soft white cloth with the mixture. Blot the stain and wait a few moments so that the product has time to work. Afterwards, blot the area with a soft, dry, white cloth to absorb the stain. Repeat the operation until the fabric is clean again. If the stain has not disappeared, increase the concentration of Fabric Ink & Plus Remover in the mixture.

Part No.	Description		Size	€
63549	FABRIC INK & PLUS REMOVER		250ML	23.05

CHEWING GUM AWAY

Chewing Gum Away is a solvent-based cleaning product that is a very effective solution that can completely remove chewing gum from fabric.

Pre-Test: Dampen a white cloth with water only. Rub the fabric lightly on a hidden spot to see if colour is transferred to the cloth or if there is a colour change in the fabric once dry. If colour is removed with water alone, it's certain that any product will remove colour, so do not use the cleaner in such cases. If there is no colour loss or change with water, do the same test with Chewing Gum Away and ensure that you are satisfied with the results.

Directions: Apply the product directly to the chewing gum and around it without diluting the product. Wait a few seconds and rub with a medium-hard bristle brush until the chewing gum is completely removed. Repeat if necessary.

Part No.	Description		Size	€
63508	CHEWING GUM AWAY		250ML	35.33

FABRIC ORGANIC REMOVER

Fabric Organic Remover is a specific water-based cleaner for cleaning blood stains from fabric. The product is very easy to apply and remove.

Pre-Test: Dampen a white cloth with water only. Rub the fabric lightly on a hidden spot to see if colour is transferred to the cloth or if there is a colour change in the fabric once dry. If colour is removed with water alone, it's certain that any product will remove colour, so do not use the cleaner in such cases. If there is no colour loss or change with water, do the same test with Fabric Organic Remover and ensure that you are satisfied with the results.

Directions: Apply Fabric Organic Remover directly onto the bloodstain and leave to act for a few minutes. Blot the area with a dry white cloth in order to absorb the blood.

Repeat the operation until the stain has completely disappeared.

Part No.	Description		Size	€
66221	FABRIC ORGANIC REMOVER		250ML	17.56

FABRIC RUST REMOVER

Fabric Rust Remover is a specific water-based cleaner for removing rust stains from fabric. The product is easy to apply and to remove.

Pre-Test: Dampen a white cloth with water only. Rub the fabric lightly on a hidden spot to see if colour is transferred to the cloth or if there is a colour change in the fabric once dry. If colour is removed with water alone, it's certain that any product will remove colour, so do not use the cleaner in such cases. If there is no colour loss or change with water, do the same test with Fabric Rust Remover and ensure that you are satisfied with the results.

Directions: Apply Fabric Rust Remover directly onto the rust stain and leave for a few minutes. Blot the area with a dry white cloth in order to absorb the rust.

Repeat the operation until the stain has completely disappeared.

Part No.	Description		Size	€
63552	FABRIC RUST REMOVER		250ML	17.56

LEATHER & TEXTILE ODOR REMOVER

Leather & Textile Odor Remover is a product for removing unpleasant smells that have penetrated into the cushioning.

Pre-Test: Dampen a white cloth with water only. Rub the surface lightly on a hidden spot to see if colour is transferred to the cloth or if there is a colour change in the surface once dry. If colour is removed with water alone, it's certain that any product will remove colour, so do not use the cleaner in such cases. If there is no colour loss or change with water, do the same test with Leather & Textile Odor Remover, and ensure that you are satisfied with the results.

Directions: The product can be applied by spraying it on the surfaces or by injecting it into the cushioning. If the smell comes from the cushioning surface, spray the product directly over the affected area. If the smell is penetrated and absorbed into the cushioning, take a syringe and fill it with Leather & Textile Odor Remover. Afterward, insert the needle in various areas of the sofa and inject the product to dampen all the padding of the sofa. Leave to dry naturally.

Part No.	Description		Size	€
77445	LEATHER & TEXTILE ODOR REMOVER		250ML	23.54

TEXTILE STAIN REMOVER

Textile Stain Remover is an effective water-based delicate cleaner for most types of fabric. It cleans dark stains such as wine, fruit juice, tea, oil and coffee. Textile Stain Remover is easy to apply and very effective.

Pre-Test: Dampen a white cloth with water only. Rub the fabric lightly in a hidden area to see if colour is transferred to the cloth. If colour is removed with water alone, it's certain that any product will remove colour, so do not use the cleaner in such cases. If there is no colour loss with water, gently shake the bottle, spray Textile Stain Remover on a hidden area, and make sure that you are satisfied with the result.

Directions: First try to remove as much dirt as possible with an absorbent, non-abrasive paper. Wet the microfiber glove with water and try to remove as much of the stain as possible, rubbing gently with circular movements from the outside inwards. Shake the bottle and apply Textile Stain Remover directly to the stain to soak the fabric. Leave to dry for a few hours (better if all night long) and then remove residue with the wet microfiber cloth. Heavily soiled areas may need to be treated again using a larger amount of product. Leave to dry naturally.

63504	ADHESION PROMOTER		250ML	28.35

BENEFIX

Benefix is an extraordinary, water-based fixing agent to stop discolouring or other colour loss that may occur in nubuck and suede leather. It maintains the original brightness and nap effect of the fibres without affecting the original softness and feels.

Directions: First, revive the nubuck or suede leather with the Reviving Sponge. Mix 1 part Benefix with 2 parts water. Mix well and spray on. One light coat should be enough to stop discoloration. Benefix will form a very soft, protective film. When dry, you can use the Reviving Sponge again if necessary to achieve the desired feel.

Part No.	Description		Size	€
63505	BENEFIX		1L	93.80

COLOR BONDER

Colour Bonder is an impregnation agent that greatly improves adhesion when added to the base colour or topcoat. It also acts as a leveller to increase coverage of the leather's surface by improving product flow.

Directions: It is used in about 3-5% of the total weight of the base colour or of the topcoat.

Part No.	Description		Size	€
64117	COLOR BONDER		250ML	37.13

CROSSLINKER AZ6

Crosslinker AZ6 is an innovative and powerful crosslinking product. It has to be used along with water-based Topcoats and Adhesion Promoters to improve the finishing performance.

Direction for use: Use Crosslinker AZ6 in a ratio of 4% on the total weight of the Topcoat or Adhesion Promoter used. During the use of the product, it is essential to protect the airways and work in a ventilated environment.

Notes: Crosslinker AZ6 is a concentrated product that needs precise guidelines for correct use. Pre-dilute the crosslinker in a ratio of 1:1 in weight with water and mix well for about 20 seconds. Mix the diluted Crosslinker with the product to be crosslinked (do not work the opposite way). During this operation, it is essential to keep stirring for about 1 minute to guarantee the homogeneity of the mixture. Use the mixture within 8 hours.

Part No.	Description		Size	€
77334	CROSSLINKER AZ6		250ML	115.26

CROSSLINKER IC

Crosslinker IC is an innovative and powerful crosslinking product. It has to be used along with water-based Topcoats and Adhesion Promoters to improve the finishing performance.

Directions: Mix Crosslinker IC in a ratio of 8% on the total weight of the Topcoat or Adhesion Promoter used.

Notes: Crosslinker IC is a concentrated product that needs precise guidelines for correct use. Pre-dilute the Crosslinker in a ratio of 1:1 in weight with water and mix well for about 20 seconds. Mix the diluted Crosslinker with the product to be crosslinked (do not work the opposite way). While doing this, it is essential to keep stirring for about 1 minute to guarantee the homogeneity of the mixture. Use the mixture within 8 hours.

Part No.	Description		Size	€
77341	CROSSLINKER IC		250ML	57.92

ECO-CROSSLINKER

Eco-Crosslinker is a safe, water-based crosslinker. It's used in waterborne topcoats to improve (wet and dry) rub resistance and adhesion. As a non-hazardous product, it's easier to transport than its solvent equivalent.

Directions: Eco-Crosslinker can be used at 7-8% of the total weight of the final mix (Top Coats, Adhesion Promoter, etc).

Important: The crosslinker should be added while stirring the mixture to ensure the crosslinker is fully blended. Keep stirring for one minute. Mixtures containing Eco-Crosslinker must be used within 8 hours.

Part No.	Description		Size	€
70765	ECO CROSSLINKER		50ML	43.20

LEATHER FRAGRANCE ADDITIVE

Leather Fragrance Additive is a fragrance to be added to topcoats. The smell we associate with leather is actually a chemical used in the tanning process. Fenice have developed a product that replicates this smell and can be added to water-based Top Coat Gloss, Top Coat Matte, and Top Coat Fast in a quantity of 0.3% to lend a pleasant leather aroma.

Part No.	Description		Size	€
60033	LEATHER FRAGRANCE ADDITVIE		20ML	52.89

FM SLIP ADDITIVE

FM Slip Additive is a feel modifier that achieves a silky and slightly wet feel. When added to Top Coat, it remarkably increases scuff and wet rub resistance.

Directions: Use FM Slip Additive mixed with Top Coat in a quantity of up to 3%, based on the desired degree of slippage.

Part No.	Description		Size	€
63540	FM SLIP ADDITIVE		250ML	54.24

DULLING AGENT

Dulling Agent is a water-based product specially formulated to obtain the desired level of opacity when used together with the Touch Up Pigment series.

How To Use: Add in a ratio of up to 1:1 to the bright Touch Up Pigment series, then stir well to blend before application. It is essential to stir the product very well before use.

Part No.	Description		Size	€
63530	DULLING AGENT		1L	116.53

FAST LEATHER GLUE

Fast Leather Glue is a very tough and flexible adhesive product specially formulated for the quick repair of cuts, abrasions and scratches on the surface of leather and vinyl. Thanks to its flexibility, it can be used on leathers without altering their physical characteristics.

How to use: Clean the area to be treated with Strong Cleaner. Once dry, apply Fast Leather Glue with a thin spatula or knife directly on the sharp edges of the cut to be repaired. Immediately join the parts to be glued and eliminate any excess. Heat with a heat gun for a few seconds or let it dry naturally for a few minutes. If you are repairing a tear it is necessary to use the reinforcement gauze, a support material, to increase the adhesive strength of the Fast Leather Glue and thus prevent the tear from reopening in the future. Different types of material are suitable for this purpose: for example fabric for T-shirts or other flexible fabrics such as that used to cover the bottom of sofas.

Part No.	Description		Size	€
205321	FAST LEATHER GLUE		15ML	22.83

GRAIN COPIER

Grain Copier is a technologically advanced product made up of 2 components that is used to recreate to effect of the grain on the skin of leather.

How to use: Apply the Skin Protector to the skin in a location close to the are that needs to be repaired. Push an equal quantity of the two components out of the two cartridges and mix well and quickly. Immediately apply the product on the skin in an undamaged place, previously treated with the Protective. Cover with the Hot Repairer. Let it dry. Lift the applied product.

Part No.	Description		Size	€
63541	GRAIN COPIER		50ML	85.61

HEAT REPAIR

The Heat Repair is specialty repair compound that is cured by heating with the Heat Iron to produce a permanent, flexible bond with the surrounding leather. When properly applied, the repair becomes invisible and extremely durable.

How To Use: Clean the damaged part with Deep Cleaner F.

Fill the damaged area with the Hot Repairer. Apply the copy of the leather grain (made with the Grain Reproducer) over the Hot Repairer. Make sure that the Teflon-coated paper is placed over the copy of the leather grain. Heat the part with the Hot Underwire, sliding it slowly with circular movements over the Hot Repairer for 30-40 seconds, then let it cool for about a minute. Remove the Teflon-coated paper and the copy of the leather grain. The latter can be kept aside and reused or thrown away after use. It is possible to recolour the damaged area with the “Retouch” colours or refinish the whole leather, as needed. Finally apply the Protector over the entire area.

Part No.	Description		Size	€
66191	HEAT REPAIR		15ML	48.95

PLASTIC PRIMER S

Plastic Primer S is a solvent-based adhesion promoter designed for the plastic parts of car interiors. Its an effective product used as a primer before renovating plastic parts, due to its incredible adhesion, quick drying time and maximum transparency.

How To Use: The product is ready to use. The new 250 ml bottle format allows a better application of the product, it can be applied by spray using an airbrush or with a pad, allowing to optimize the quantity dispensed without waste and more effectively. Spray a single abundant coat, then proceed with a heat gun to speed up drying.

Part No.	Description		Size	€
74335	PLASTIC PRIMER S		250ML	23.05

SURFACE REPAIR

Surface Repair reconstructs damaged surfaces in the event of scratches, scars and abrasions on pigmented leathers.

How To Use: Clean the damaged area with Deep Cleaner F, then dry the surface with a professional heat gun or blower. Apply Surface Repair on the damaged spot using a spatula. Use small quantities of product in order to create a fine line. The direction of the first stroke should be the opposite direction in which the damage was created. The direction of the second stroke should be in the same direction the damage was created. Dry with a blower then repeat while applying thin layers until the damaged area is completely filled. Then spray the area with the correct colour and dry with a blower again. Repeat process until area is completely covered with paint.

Part No.	Description		Size	€
66189	SURFACE REPAIR		15ML	39.47

MENDER FAST

Mender Fast is a thick paste used in leather renovations to hide defects such as scratches, thorn marks, cracks or abrasions. It can be easily sanded and the new formulation allows you to speed up the drying process using a heat gun.

How To Use: Apply with a spatula, leave to dry, and then sand with abrasive paper to produce a smooth surface, ready for the subsequent finishing. Mender Fast adheres well to leather, even if the leather is greasy and not very absorbent. Lightly overfill the defect, by adding less product, it will take quicker to dry. You may also dry the leather with a heat gun at a temperature not above 80 °C. The product dries in just a few minutes. It may be also colored as desired by adding up to 10% of Touch Up Pigment and/or High Coverage Color.

Part No.	Description		Size	€
76752	MENDER FAST		75ML	28.73

TOUCH-UP LEATHER PIGMENT (TUP)

Touch-Up Leather Pigment (TUP) represents the simplest and most effective solution for the repair of damaged sections of pigmented leather products. These are ready-to-use coatings, self-fixing, solvent-free and available in the following colors: WHITE, SUPER BLUE, BORDEAUX, CAMEL, COBALT, YELLOW GOLD, LEMON, LIGHT BROWN, MAHOGANY, BLACK, RED.

How To Use: Clean the surface to be treated with [Leather Cleaner](#) then let it dry. If necessary, repair any scratches or cuts with [Mender Fast](#) and / or [Glue - Leather Glue WB](#). **TUP** is available both in 10 pre-mixed colours or bespoke matched colours to your colour sample on request. To obtain the desired gloss level, add [Dulling agent](#) as needed. Test the color in a hidden area to make sure it matches that of the skin. In order to evaluate this, it is necessary to wait for the applied colour to dry. Apply **TUP** with a soft cloth or sponge, taking care to spread the product evenly, then dry with hot air gun or hair drier. If necessary, repeat several application / drying treatments until satisfactory coverage of defects and uniformity of colouring is achieved. Preferably perform several Retouching applications in small quantities, interspersed with drying, avoiding applying excessive quantities of material. If a large area is to be treated, a reconstruction of the finish will have to be performed, therefore we recommend the use of Concentrated Coloured Base and Fixative. At the end of the Touch Up treatment, apply [Leather Protector](#) on the area surrounding the treated point to obtain uniformity of appearance and protection from dirt.

Tips:

- A.** If the color does not exactly match the leather sample and the area to be treated is not subject to strong rubbing, you can add a little colour to the sponge or cloth on which you have poured [Leather Protective](#) and spread it on a wider area than that to be repaired to obtain a more homogeneous effect. Applying [Leather Protector](#) after repair can also help smooth out the area.
- B.** For leather with a two-tone effect, it may be necessary to randomly dab the repaired part with further small doses of product to simulate the two-tone effect. On the other hand, for strong two-tone colours, it will be necessary to slightly darken the colour before proceeding with a random dabbing on the repaired area.
- C.** After finishing the repair, massage the skin. If possible, grasp the skin with both hands around the treated area and move the skin in all directions. This will reactivate the grain of the leather, giving the repair a much more natural look.

Part No.	Description		Size	€
FENICE/TUP/250	FENICE TOUCH-UP PIGMENT		250ML	42.50
FENICE/TUP/500	FENICE TOUCH-UP PIGMENT		500ML	73.00
FENICE/TUP/1000	FENICE TOUCH-UP PIGMENT		1LT	133.50

HIGH COVERAGE COLOUR (HCC)

The **High Coverage Colour** bases have a high concentration of pigments to allow greater coverage and fast results while maintaining the fundamental technical characteristics such as resistance, flexibility and duration of the repair. The greater coverage provided also makes it easier to change the colour of leather items.

How To Use: Test the colour accuracy by mixing the necessary tones of the coloured base. Apply the product with a sponge or spray gun concentrating on difficult areas. Apply 1 or maximum 2 light coats. To speed up the drying operation, use a heat gun. Top coat must be used after application. Do not use on suede / Nubuck.

The Concentrated Coloured Bases are available in the following colours: WHITE, SUPER BLUE, BORDEAUX, CARAMEL, COBALT, GOLD YELLOW, LEMON, LIGHT BROWN, MAHOGANY, BLACK, RED; and in metallic and pearl colours: SILVER, BRONZE, GOLD, PEARL, COPPER.

FENICE/HCC/1000	FENICE TOUCH-UP PIGMENT		1LT	133.50

TOP COAT FAST

Top Coat Fast is a ready-to-use water-based product, ideal for the finishing of automotive leathers. It is characterized by excellent adhesion and distension, which allows it to even out the surface of the skin. Thanks to its advanced formulation, enriched with touch modifiers, the resulting feel is extremely pleasant. Top Coat Fast has a medium hard film with excellent physical-mechanical strengths. These properties can be further improved with the use of the Eco Catalyst or the AZ6 Catalyst. Once mixed with the Catalyst, the mixture must be used within 8 hours.

How To Use: Apply the product by dabbing with a sponge in the most difficult to reach areas. Then spray a light layer, maximum two, to increase resistance to rubbing. It is advisable to speed up drying by using a heat gun or other heat source. This ensures longer lasting finishing time. Apply the second step by spraying as soon as the first is dry.

Part No.	Description		Size	€
77315	TOP COAT FAST		250ML	41.27
77316	TOP COAT FAST		1L	129.80

TOP COAT GLOSS

Top Coat Gloss is a ready-to-use, waterborne topcoat characterised by a glossy, bright, durable film that is also extremely scratch resistant. It has a slightly slippery feel and achieves a high-gloss finish with excellent (wet and dry) rub and scratch resistance. Alternatively, Top Coat Gloss may be mixed with Top Coat Matte to obtain the desired degree of opacity. To improve the fastness, especially when wet, the Eco Cross Linker or the AZ6 Cross Linker must be added to Top Coat Gloss. Once mixed with the Cross Linker, the mixture should be used within 8 hours.

How To Use: Apply with a sponge to the most problematic areas, then spray a light layer, maximum two, if you want to increase rub resistance. For optimal performance, we recommend accelerating the drying process by using a professional heat gun.

Part No.	Description		Size	€
63561	TOP COAT GLOSS		1L	117.33
63565	TOP COAT GLOSS		250ML	38.55

TOP COAT MATTE

Top Coat Matte is a water-based, low-gloss fixing product for pigmented leather, characterised by excellent adhesion and outflow. It provides a uniform degree of opacity and high general fastness. The resulting feel is very pleasant. Top Coat Matte forms a medium-hard film with a slightly waxy feel and very good physical / mechanical properties, which is further enhanced by using Eco-Crosslinker or Crosslinker AZ5. Top Coat mixed with these must be used within 8 hours.

How To Use: Apply the product with a sponge for difficult areas, then spray one light coat, or two if you want to increase rub resistance. You can reduce drying time by using a professional heat gun.

Part No.	Description		Size	€
63564	TOP COAT MATTE		1L	126.89
63565	TOP COAT MATTE		250ML	38.55

PROFESSIONAL LEATHER REFINISHING MIDI KIT

Designed to clean, repair and restore leather sofas and automotive parts, such as steering wheels and seats made of leather or plastic. It comes together with the Accessory Kit.

The Leather Restoration Pro Kit contains:

- 1 x 250 ml Ultra Rapid Leather Cleaner
- 1 x 250 ml Power Cleaner
- 2 x 250 ml Extra Adhesion
- 14 x 250 ml High Coverage Colour
- 2 x 250 ml Top Coat Matte
- 1 x 250 ml Top Coat Gloss
- 1 x 250 ml Leather Protector
- 1 x 250 ml Dye Transfer Stain Remover
- 1 x 20 ml Ink Remover
- 1 x 20 ml Leather Glue WB
- 1 x 75 ml Mender Fast
- 1 x 50 ml Grain Copier
- 1 x 15 ml Heat Repair
- 1 x 15 ml Surface Repair
- 1 x 250 ml FM Slip Additive
- 1 x 250 ml FM Non-Slip Additive
- 11 x 250 ml Touch Up Pigment
- 1 x 250 ml Dulling Agent
- 1 x 250 ml Deep Cleaner F
- 1 x 50 ml Eco-Crosslinker
- 1 x 400 ml Leather & Textile Degreaser
- 1 x 20 ml Leather Additive Fragrance
- 1 x 250 ml Color Bonder
- 1 x 250 ml Filler Additive

- 1 Heat Iron
- 1 Heat Paper Repair
- 1 Supportive Mesh
- 1 Cutter
- 1 Spatula
- 1 x 3 ml Graduated Pipette
- 1 x 400 Sand Paper
- 1 x 800 Sand Paper
- 10 Microfiber Glove
- 20 Stain Eraser Sponges
- 10 High-Density Sponges
- 1 Paper Filter
- 1 x 100 ml Measuring Cup
- 1 x 250 ml Measuring Cup
- 1 x Grain Copier Applicator
- 3 x Grain Copier Mixer
- Fenice Catalogue

AUTOCOLOR PRO

Autocolor Pro is an innovative mobile device used to accurately measure colour and transmit colour data directly to your smartphone or tablet via a dedicated app. Scan colours with Autocolor Pro and get the recipe directly on your smartphone.

Its industry leading precision and extreme ease of use make this the perfect device for isolating ambient light and achieving an accurate colour reading. The output is then compared with the colour recipes in the Fenice Care System library to provide the closest formula for the desired colour.

It ensures optimal battery management and is compatible with iPhone 4S and subsequent versions, iPad 3rd generation or higher, iPad mini and iPod touch 5th generation, as well as Android phones.

Part No.	Description		Size	€
202232	AUTOCOLOR PRO			1130.06
202237	AUTOCOLOR MINI			484.31

DUAL ACTION SPONGE

Dual Action Sponge consists of 2 joined sponges. The colour side is used for routine cleaning, whereas the white side is used for stain removal or eliminating ingrained dirt on small areas. It is compatible with all of Fenice’s water-based cleaners.

Part No.	Description		Size	€
12215	DUAL ACTION SPONGE			4.39

SUPPORTIVE MESH

Supportive Mesh is a very strong mesh used to repair cuts and holes.

Part No.	Description		Size	€
59782	REPAIR SUPPORT MESH			9.50

HIGH DENSITY SPONGE

High Density Sponge is a very resistant sponge that can be used with any solvent-based cleaners.

Part No.	Description		Size	€
292	DAUBER SPONGE FOR TUP			1.00

REVIVING SPONGE

Reviving Sponge restores the nap effect typical of nubuck and suede leather.

How To Use: After wetting nubuck or leather or after using for some time, nubuck leather may appear darker or lose its characteristic nap. This is normal as the leather has been dampened or used and the fibres have been pressed down. When dry, gently rub this dry sponge over nubuck or suede leather to open the fibres and restore its original colour, softness and effect.

Part No.	Description		Size	€
54935	TIMBERLAND / PULL-UP LEATHER REVIVE SPONGE			3.68

NUBUCK STAIN ERASER CLOTH

Nubuck Stain Eraser Cloth has exceptional characteristics that is highly effective at removing stains and dirt from nubuck and suede leather. It is highly efficient in removing dust, stains and marks. It is an environmentally safe cleanser for your sofas, clothes, handbags and shoes.

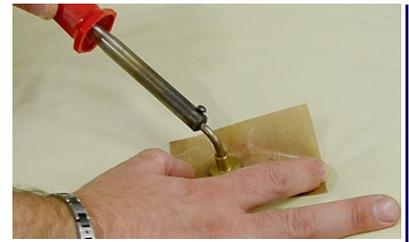

How To Use: Clean stains with the Nubuck Stain Eraser Cloth by gently rubbing the article until the stain disappears. Renew protection using Ecoguard Nubuck Protector for an ideal finish.
