TECHNICAL DATA SHEET – Leather Care Div.

BENEFIX[®]

DESCRIPTION

Fixing agent for nubuck and suede leathers.

Benefix[®] is an extraordinary water-based fixing agent to stop discolouring or colour loss that may occur from nubuck and suede leathers.

HOW TO USE

It maintains the original brightness and nap effect of the fibers without affecting the original softness and feel.

First, revive the nubuck or suede leather with the **Reviving Sponge**. Add to one part of **Benefix[®]** two parts of water, mix well and spray apply.

One light coat should be enough to stop discolouring. **Benefix[®]** will form a very soft protective film. When dry, you can use the **Reviving Sponge** again if necessary for achieving the desired feel.

PHYSICAL CONSTANTS	Standard Value	Test Method
Appearance	Whitish emulsion	MDA 008
Dry content (%)	16 ± 2	MDA 010/011
pH (1:10)	7.0 ± 1	MDA 004
Density (g/cm ³)	1.02 ± 0.05	MDA 018

STORAGE	Rev.
Non-dangerous product. Store between +5/40°C.	07.2013

MINIMUM SHELF-LIFE

The product is guaranteed for its physical and quality characteristics 24 months from the date of production. It has to be kept in its original packaging, well sealed and stored following the conditions in our technical data.

This document is exclusively reserved for professional users.

All information regarding correct use and any hazardous content are available in the safety data sheets.

All our information and suggestions are supplied on the basis of our present knowledge, and are subject to careful tests. However, we cannot accept responsibility for the use of the product, which must be verified and evaluated for its suitability or otherwise by the customer. Declared physical constants are monitored in production and guaranteed by FENICE S.p.A.
