

# CRAFTSMAN'S PAINT, VARNISH & LACQUER REMOVER

Nitromors Craftsman's Paint, Varnish & Lacquer Remover is perfect for those intricate mouldings and carvings due to its thin consistency. It comes in a cloudy liquid form, making it ideal for getting into all those small areas that a thicker product couldn't reach. Don't be fooled though, what it lacks in thickness, it makes up for in strength!

## HOW TO USE

1. Pour into a suitable glass or metallic container, and replace screw cap immediately. Apply a thick coat with a dabbing action (2-3mm). Do not brush out.
  2. Once paint has blistered (5-10 mins) apply second coat, working into the blistered paint. Do not attempt to remove paint. Leave up to 40 minutes. If dried out re-apply.
  3. Remove blistered and softened paint with a scraper or shavehook. In difficult areas use an old nylon toothbrush. Repeat if necessary. Expert Tip: for intergrated paint, rub with wire wool dipped in Nitromors to achieve a really clean finish!
- Top Tips:** Wash off with white spirit and wire wool only. Allow to dry thoroughly and rub down with fine sandpaper or wire wool prior to refinishing.
- Cleaning up:** Collect waste in newspaper, leave outside in safe place until dry. Dispose of in a dustbin. Clean tools etc. in warm soapy water and avoid contact with plastic sinks or baths.

■ Appearance	White low Viscosity gel.
■ Specific Gravity	0.850 to 0.950
■ Viscosity	200 to 1000 cps
■ Active Content % m/m	70 to 100
■ Flammability	Highly flammable liquid.
■ Composition Data	Free flowing blend of acetals and hydrocarbon solvents with surfactant, activator, paraffin wax evaporation retardant and corrosion inhibitor.
