TECHNICAL DATA SHEET – Leather Care Div.

POWER CLEANER

DESCRIPTION

Water-based product engineered for the professional cleaning of plastic and leather car interiors.

HOW TO USE

Pre-test: Due to the variety of car interiors, it is suggested to make a test with **Power Cleaner** on a hidden area to be sure your car interiors are fully compatible with the cleaning procedure. Wet the sponge with water. Gently rub in a hidden area and check if there is colour loss on the sponge. If not, for the cleaning of leather dilute 1 part of **Power Cleaner** in 5 to 8 parts of water and for the cleaning of plastic areas dilute 1 part of **Power Cleaner** in 3 to 5 parts of water, then wet the sponge with the prepared mix. Repeat the test you did before and check if there is no colour loss on the sponge. If you are satisfied with the result, proceed with the cleaning process.

Directions: Wet the sponge with **Power Cleaner** already diluted and rub with circular movements all plastic and leather car interiors. After cleaning, rinse with water and let dry at room temperature.

PHYSICAL CONSTANTS	Standard Value	Test Method
Appearance	colourless-yellowish liquid	MDA 008
pH (1:10)	9.5 ± 0.5	MDA 004
Density (g/cm ³)	1,03 ± 0.05	MDA 018

STORAGE	Rev.
Non-dangerous product. Store between +5/40°C.	12.2020

MINIMUM SHELF-LIFE – HANDLING INSTRUCTIONS

The product is guaranteed for its physical and quality characteristics 24 months from the date of production. It has to be kept in its original packaging, well sealed and stored following the conditions in our technical data.
