TECHNICAL DATA SHEET – Leather Care Div.

TEXTILE STAIN REMOVER

DESCRIPTION

An effective water-based delicate cleaner on most types of fabric. It cleans coloured stains such as wine, fruit juice, tea, oil and coffee. **Textile Stain Remover** is easy to apply and does not leave residue.

HOW TO USE

Pre-Test: Dampen a white cloth with water only. Rub the fabric lightly in a hidden area to see if colour is transferred to the cloth. If colour is removed just with water, it is certain that any product will remove colour, so in this case do not use the cleaner. If there is no colour loss with water, gently shake the bottle, spray **Textile Stain Remover** in a hidden area, being sure that you are satisfied with the result.

Directions: Spray **Textile Stain Remover** directly onto the stain. Leave to work for about 6-8 hours. If after this period of time, the stain is not completely removed repeat the operation. If the product has not been able to clean the fabric, contact our technicians.

PHYSICAL CONSTANTS	Standard Value	Test Method
Appearance	Transparent liquid	MDA 008
pH	4.0 ± 1	MDA 004
Density (g/cm ³)	1.01 ± 0.05	MDA 018

STORAGE	Rev.
Non-dangerous product. Store between +5/40°C	07.2017

MINIMUM SHELF-LIFE – HANDLING INSTRUCTIONS

The product is guaranteed for its physical and quality characteristics 12 months from the date of production. It has to be kept in its original packaging, well sealed and stored following the conditions in our technical data.

This document is exclusively reserved for professional users.

All information regarding correct use and any hazardous content are available in the safety data sheets.

All our information and suggestions are supplied on the basis of our present knowledge, and are subject to careful tests. However, we cannot accept responsibility for the use of the product, which must be verified and evaluated for its suitability or otherwise by the customer. Declared physical constants are monitored in production and guaranteed by FENICE S.p.A.
